Executive Summary

Overview
The Community Health Assessment (CHA) is a process by which community members gain an understanding of the health concerns and health-care systems of the community by identifying, collecting, analyzing and disseminating information on community assets, strengths, resources and needs.

- It is the foundation for improving and promoting the health and welfare of community members.
- It is used to identify factors that will affect the health and welfare of a population and determine the availability of resources within the community, such as leaders, public health agencies, businesses, hospitals, private practitioners and academic centers.
- Provide a resource for the community, including a Community Resource Guide, which is found in Appendix D. The Community Resource Guide will also be available on the Health Department website, and printed at Caldwell County Health Department and all Caldwell County Libraries.

Priority Determination
On December 6, 2017, the Community Health Assessment Advisory Committee reviewed all data collected from numerous outside sources and the community health assessment opinion survey in order to determine Caldwell County’s top three health priorities for the next three years. Each member ranked the priorities from 1 to 5 based on the magnitude, seriousness of consequences and the overall feasibility (5 being the priority with the highest magnitude, seriousness and overall feasibility). There was an open discussion following the ranking exercise. The top three priorities chosen for the 2017-2020 Caldwell County Community Health Assessment are:

1. Preventative Care: Preventative care is routine health care that includes screenings, services and counseling to help prevent illness, disease or other health problems. Examples of preventative care include wellness visits, standard immunizations and screenings for blood pressure, cancer, cholesterol, depression, obesity and Type 2 diabetes as well as, pediatric screenings for hearing, vision, autism and developmental disorders, depression and obesity. Organizations involved include: Caldwell County Health Department, UNC Caldwell Health, Caldwell County School System, and West Caldwell Health Council, among other community partners.

2. Substance Abuse: Substance abuse and misuse continues to be a major health concern and issue in Caldwell County. Substance abuse can include the misuse or abuse of alcohol and illicit drugs. In 2016, according to the Injury and Violence Prevention Branch, there were 17 unintentional opiate poisoning deaths, 2 heroin deaths, 24 medication poisonings and 11 benzodiazepine poisoning deaths in Caldwell County. Community groups will be working on this issue, providing prevention and awareness education along with promoting Operation
Medicine Drop locations and equipping the community (agency employees, pharmacies, healthcare, etc.) with naloxone.

3. Mental Health: Mental health is not just emotional health, it also includes psychological and social wellbeing. Mental health affects how we think, feel and act; as well as how we respond to stresses, interact with others and make choices. During each stage of life, mental wellbeing is important. Issues around mental health continue to be a target area for improvement in Caldwell County. While resources related to mental health are limited, Caldwell County has a need for these types of services. Strategies to target these issues will include building community partnerships that will focus on providing adequate resources to the public with the goal of reducing the stigma surrounding these conditions. Community collaboration will also work towards increasing the support that is in place to provide help to those suffering from mental health conditions. Organizations involved include: Caldwell County Health Department, UNC Caldwell Health, VAYA Health, and RHA Health Services.
Background/Introduction

The 2017 CHA is a collaboration among multiple agencies within Caldwell County. It represents the most updated data available prior to publications of the CHA. After the collection of over 620 opinion surveys, the Caldwell County Health Department hosted advisory committee meetings and focus groups to gain an understanding of both stakeholders’ and community members’ thoughts on the selected priorities.

Data Collection
To ensure the quality of the CHA, primary data (collected directly, including focus group data) and secondary data (collected from other sources) must be used in the CHA process. To achieve this, the Caldwell County Community Health Assessment Advisory Committee did the following:

- Created a Community Health Assessment Opinion Survey, which was used to collect primary data.
  - Partnered with the courts to distribute surveys to individuals selected for jury duty
  - Placed the survey online, distributed through multiple local list serves and had paper copies available at the county library and the Caldwell County Health Department
  - Had over 620 individuals complete the Opinion survey

- Conducted 4 focus groups:
  - The CHA steering committee selected groups which would represent a variety of socioeconomic and demographic groups in Caldwell County.
    - Adult: County employees
    - Low-income/minority: participants from Family Resource Center
    - Teen: students from Hibriten High School 10-12th grades
    - Senior-Adult: participants from the Senior Center
  - Participants of these groups were solicited by email list serves, fliers and other established groups

- Researched secondary data from a number of resources which included but not limited to:
  - North Carolina Department of Labor
  - NC SHIFT
  - North Carolina State Center for Health Statistics
  - Census
  - Environmental Protection Agency
  - County Health Rankings and Roadmaps
**Priority Selection**

During Phase I of the CHA process, members of the planning team brought forth ten priorities to the advisory committee. These priorities came from the community health assessment opinion survey. Graph 1 and Graph 2 show the survey results for the top priorities listed in the survey. Five priorities were chosen by the advisory committee using an impact matrix (Graph 3). Impact, output, current resources and current programs were all measured to determine where each priority would fall on the matrix. The five priorities chosen were Mental Health, Substance Abuse, Chronic Disease, Preventative Care and Education/Economy.

The Top Unhealthy Behaviors in Caldwell County

Source: Community Health Assessment Surveys

Based on the 2017 CHA Opinion Survey

Graph 3

Impact Matrix

Substance Abuse  Mental Health
Preventative Care
Education/Economy
Chronic Disease
During Phase II of the CHA process, members of the advisory committee worked with individuals of different demographic and socioeconomic groups to organize focus groups. During these four focus sessions, qualitative and quantitative data was collected on each of the five priorities. Graphs 4 and 5 show results of the quantitative data collected during the focus groups. The advisory committee used primary data and secondary data to choose the top three priorities: preventative care, mental health and substance abuse.

Graph 4

Source: Community Health Assessment Focus Groups

Graph 5

Source: Community Health Assessment Focus Groups
Populations at Risk
Health issues affect communities on multiple levels: individually, economically, socially and spiritually. After collecting primary, secondary and focus group data, the advisory committee identified a number of at risk populations which experience access issues to health care and the possibility of decreased health and wellness in Caldwell County. These groups include:

- **Low income**- These individuals are at risk for decreased access to medical care and social status, both linked to better health. Historically, lower income individuals have less access to healthy foods, increasing their chances of developing chronic diseases, such as heart disease and obesity.

- **Uninsured**- These individuals face barriers to access healthcare every day. Having decreased coverage could lead to delays in receiving appropriate care, the inability to obtain preventative services and an increase in hospitalizations, which could lead to decreased health.

- **Teens**- Teens are at risk for many health issues. What choices teens make today will drastically affect their quality of life as an adult, both physically and mentally.

- **Elderly**- This population usually has limited health coverage with an increased need for ongoing primary and acute care. Chronic Diseases and other debilitating diseases are highly prevalent in this age group. This, in turn, results in an elevated need for healthcare.

- **Adults in need of mental health and substance abuse services**- In Caldwell County, mental health services are limited. Those individuals who struggle with mental health and substance abuse have inadequate resources to positively influence their health, both physically and mentally.
Caldwell County Description

History of Caldwell County

Caldwell County was formed on January 11, 1841. It is located in the northwest section of North Carolina in the foothills. Caldwell County is bordered on the northwest by Watauga County, on the northeast by Wilkes County, on the east by Alexander County, on the south by Catawba and Burke Counties and on the west by Burke and Avery Counties. Today, there are nine incorporated municipalities in the county: Lenoir, Hudson, Granite Falls, Cedar Rock, Cajah’s Mountain, Gamewell, Sawmills and parts of Blowing Rock and Rhodhiss.

Caldwell County was named for Dr. Joseph Caldwell, former President of the University of North Carolina and an advocate for a public school system and a railroad system to connect Morehead City to Tennessee. In 1790, the Caldwell County area had a population of 2,675 people. In 1791, Caldwell County’s first industries were built on Gunpowder Creek, near Granite Falls. This is where the Pierce Iron Forge was erected and gunpowder was manufactured for the patriots. Grist and Sawmills were developed in 1878 along streams within the county. At this time, the county had 51 grain mills, 41 sawmills, 5 furniture shops, 8 tanneries, a pottery, an implement factory, four gold mines and innumerable iron ore beds.

The Caldwell County Health Department was established in 1950 as a free clinic. Before 1950, Caldwell County was part of the Burke-Caldwell Health District. Today, the Caldwell County Health Department serves the residents of Caldwell County at the Health and Human Services Building in Lenoir, NC. They employ around 83 employees including Animal Control Officers, Clinic, Women’s Health and School Health Nurses, Health Educators, Social Workers, Physicians, Environmental Health Specialists, a Dentist, Dental Assistants, Nutritionists and Administrative/Support Staff. In 2017, CCHD served over 5,100 patients in the clinical areas.
Today in Caldwell County

Today, Caldwell County is home to over 81,287 residents. In 2014, over 37.8% of residents worked inside the county and 62.2% worked outside the county. In 2016, private industries employed over 83% of people in Caldwell County while the government employed a little over 16% of individuals. According to the North Carolina Department of Commerce, in 2017 the top employers in Caldwell County were Caldwell County Schools, Bernhardt Furniture Company and Merchants Distributors Inc. (MDI).

In 2017, 88% of Caldwell County residents were Caucasian and 5% African American, as shown in Graph 6. As shown in Graph 7, for 2017, the majority of Caldwell citizens were between the ages of 19 and 65. Graph 8 shows gender distribution for males and females in Caldwell and North Carolina with 50% female in Caldwell County and 51% female in North Carolina.
Morbidity and Mortality

Morbidity and Mortality are ongoing concerns for all counties and states. When looking at morbidity and mortality or the incidence of disease, it is important to look at modifiable and non-modifiable behaviors. During the CHA action planning sessions, Caldwell County Health Department and partners will be referring to those behaviors to ensure that Caldwell County citizens are aware of and have access to needed services and education in order to decrease morbidity and mortality. The State Center for Health Statistics compiles the top 10 causes of death each year. Caldwell County’s top ten causes of death (Chart 1) show that cancer and heart disease consistently fall at the top of the list. This has been consistent for a number of years. In 2015, there were 18,474 deaths related to heart disease and 19,322 deaths from cancer. Heart Disease and Cancer alone contributed to an average over 559,137 years of potential life lost in the State of North Carolina in 2016. Caldwell County had an average of over 5,587 years of potential life lost in 2016.

Chart 1 also compares the leading causes of death from 2014 and 2015. In 2014, all five of the leading causes of death were related to chronic disease. In 2015, unintentional injuries ranked fifth, with cerebrovascular diseases falling to sixth place. In 2014, suicide made the top 10 leading causes of death. Suicide also made the list in 2015 at number 9 and in 2016 at number 10 for leading causes of death. Nephritis, nephrotic syndrome, and nephrosis are not in the top 10 leading causes of death in 2015, being replaced instead with chronic liver disease and cirrhosis at number 10. In 2016, the same trend is observed from 2014; Nephritis, nephrotic syndrome, and nephrosis is ranked at number 9, with chronic liver disease and cirrhosis not in the top leading causes of death.

Areas of Success

There are numerous organizations and groups in Caldwell County working together to increase life expectancy and to increase quality of life in the County. We have seen success from many of the efforts throughout the county. The county has made tremendous strides in reducing rates or maintaining rates below the state level in many areas. Although teen pregnancy was not a priority in the last CHA cycle, the teen pregnancy rates have continued to show a decreasing trend, as shown in Graph 9. This not only affects teen mothers and their babies, but also the community as a whole, as teen pregnancy is associated with decreased high school graduation rates, lower income and premature births.

![Graph 9](image)

Source: North Carolina State Center for Health Statistics

The colorectal cancer death rate per 100,000 residents has decreased as well (Graph 10). This is exciting for the county, as the McCreary Cancer Center, Caldwell County Health Department and the West Caldwell Health Council have focused efforts in this area over the past few years. These programs have included education and prevention as well as screening for colorectal cancer. One event that took place was the FluFIT event held in partnership with Caldwell County Health Department and West Caldwell Health Council. During this event, free colorectal screening test kits were given to all individuals over the age of 50 who came to the Drive-Through Flu Clinic at the Health Department.
**Infant Mortality Success and Concern**

In January of 2016, Caldwell County Health Department collaborated with the Family Resource Center to begin working on decreasing infant mortality in Caldwell County. In 2015, 9.9% of babies were born at a low birthweight in Caldwell County, compared to North Carolina’s rate of 9.2%. An Infant Mortality Reduction (IMR) grant was awarded to local health departments in North Carolina to implement evidence-based strategies to decrease infant mortality in the communities they serve. With these grant funds, the Caldwell County Health Department was able to purchase and promote long-acting reversible contraceptive (LARC), safe sleep items (pack and plays, co-sleep beds, etc.) and free tobacco cessation counseling and medications through the NC QuitLine. In collaboration with the community action team, trainings focused on infant mortality were offered to providers. Educational events were organized and implemented for community members. Graph 11 shows the decrease of the infant death rate in Caldwell County; however, it continues to be an issue as one infant death is too many.
Graph 11

Infant Death Rates per 1000 live births

Source: State Center for Health Statistics
While there are areas that have proved successful over the years, there are also areas of concern for the citizens of Caldwell County. As a result of the 2017 Community Health Assessment survey data and research of secondary data, the Caldwell Advisory Committee noted several health indicators that need considerable improvement. The Advisory Committee will consider these concerns when moving forward in the CHA process and looking ahead to the Action Plans.

**Chronic Disease**

One area of concern for Caldwell County is Chronic Disease. Chronic Diseases account for over half of the top ten leading causes of death in Caldwell County including heart disease, cancer, respiratory disease, diabetes, etc. Over the past three years, this committee has worked to establish resources in the county to combat these issues. Chronic disease management programs have been successful in the community. However, in this CHA cycle the advisory committee will include Chronic Disease prevention in the preventative care action plan instead of choosing to focus solely on chronic disease management. This group believes that prevention of these diseases is the best way to decrease death rates in the future. Focusing on prevention at an early age or before the onset of a disease will, in turn, decrease the impact the disease has on quality of life.

**Data around Chronic Disease:**

Most chronic diseases are related to one of the following: personal factors (tobacco use, obesity) environmental factors (exposure to pesticides or cancer-causing substances) or non-modifiable factors (age, sex, gender, family history).

Caldwell County has seen an increase in death rates among trachea, bronchus & lung cancers over the past several years. The rate is near 70 per 100,000 residents in Caldwell County compared to the State being just 55 per 100,000 residents and declining (Graph 12). Air quality may be a risk factor for lung disease in the County; however, there have been zero days labeled as “unhealthy” for years 2013-2016. This has improved since 2007 when there were 13 days labeled “unhealthy” though, in 2016 there were still 34 days that were considered “moderate”, which could potentially affect sensitive groups such as those with COPD and asthma. Graph 13 shows the number of unhealthy days versus good days in Caldwell County since 2008.
Cancer risk can also be attributed to the use of tobacco products or the exposure of tobacco smoke. Graph 14, shows a slow decrease in the use of tobacco users in Caldwell County. The county remains higher than the state. The main concern surrounding this issue is the rate of mothers who smoke while pregnant. According to the North Carolina State Center for Health Statistics, during 2012-2016 there were 845 births in Caldwell County where the mother smoked during pregnancy. In 2016, 151 mothers smoked while pregnant.
In 2015, chronic liver disease and cirrhosis made the top ten leading causes of death. A slight increase in death rates have been seen in this area since 2008 (Graph 14). Caldwell County had a rate of 13 in 2008-2012; in 2011-2015, the rate had increased to 14.8. For North Carolina, the rate was 9.3 in 2008-2012; in 2011-2015, with a slight increase over seven years, the rate was 10.1. Caldwell rates have also consistently been higher than peer county rates in this area, which is shown in Graph 15.

Graph 15
Another area of concern is the suicide rate in Caldwell County. The suicide rate in Caldwell County has been gradually increasing. Suicide can be caused by many factors such as lack of community mental health resources, substance abuse/misuse, economy, etc. As shown in Graph 17, the rate from 2001-2005 was 12.9, from 2006-2010 it was 15.8, then increased to 19.8 from 2011-2015. In Graph 18, trend data shows the dramatic increase since 2002. Between 2012-2016, there have been 87 suicide deaths in Caldwell County. Suicide was one of the top 10 causes of death in 2011. In the 2014 CHA process, suicide was part of the mental health action plan. Training in mental health first aid and suicide prevention was conducted during the 2014 CHA Action Planning period and will continue during the action planning process for the 2017 CHA process.
Graph 18

Age-Adjusted Suicide Rates per 100,000 Residents

Source: State Center for Health Statistics
Top Health Priorities

Preventative Care
Preventative care is routine health care that includes screenings, services and counseling to help prevent illness, disease or other health problems. Examples of preventative care include wellness visits and standard immunizations, screenings for blood pressure, cancer, cholesterol, depression, obesity and Type 2 diabetes as well as, pediatric screenings for hearing, vision, autism and developmental disorders, depression and obesity.

Preventative Care in Caldwell County
In Caldwell County, there were 5.5 primary care physicians per 10,000 residents and 2.3 dentists per 10,000 residents during 2014. In the United States during 2012, 61.4% of office visits were for preventative care. North Carolina’s rate was 40.1%, which is significantly lower than the national average. Preventative care is essential in early diagnosis as well as success in treatment. This is especially true for cancer detection. Stage at diagnosis is the most important factor in determining chance of survival from many cancers including breast cancer. According to the North Carolina Central Cancer Registry, in 2013, an estimated 9,339 women in North Carolina were diagnosed with breast cancer, 88 of those were in Caldwell County. With early diagnosis, treatments can be more successful and survival rates higher. According to the American Cancer Society’s recommendations, women 40 years and older should have a mammogram every year. A clinical breast exam (CBE) by a healthcare professional is recommended annually after the age of 40. Women 20–39 years of age should have a CBE by a health care professional every three years and monthly self-examinations are an option for women beginning in their 20s. All of these preventative screenings and resources are important in preventative care.

Other areas where preventative care is essential is in the prevention and management of chronic disease. Both diseases of the heart and lung are consistently on the top ten leading causes of death within Caldwell County. In 2016, around 205 individual died of heart disease. In addition, screenings for high cholesterol and high blood pressure are important in the prevention of this disease.
Diseases of the lung are on the rise in Caldwell County; these include but are not limited to asthma, emphysema and Chronic Obstructive Pulmonary Disease (COPD). Risk factors and preventative behavior that may cause an increase in the risk for lung disease include smoking (secondhand and first hand), poor air quality, radon exposure and poor diet. Preventative care associated with decreasing the amount of lung disease in the county could potentially include lung cancer screening for high-risk individuals, smoking cessation classes, policy change for smoking in public places, awareness of air quality indicators and food package labels and nutrition education to prevent chronic disease of all types.

**Substance Misuse and Abuse**

The World Health Organization refers to substance misuse as the harmful or hazardous use of psychoactive substances, including alcohol and illicit drugs. Substance abuse or substance misuse is a great concern in Caldwell County. Substances can be classified as opiates, including heroin, morphine and opium; amphetamines including methamphetamine; barbiturates, marijuana, cocaine, prescription drugs, narcotics, alcohol, and tobacco.

Not only does substance misuse include drug use/misuse, but also alcohol and tobacco. When alcohol is used and/or abused, especially in the case of underage drinking or binge drinking, there can be an increased risk of health problems. Excessive alcohol use can lead to injury, violence and liver problems. Using tobacco products harms most organs in the body and can cause diseases. When an individual stops using tobacco products there can be both immediate and long-term benefits.
Substance Misuse and Abuse in Caldwell County

In 2016, Caldwell County had 26 unintentional poisonings. According to Graph 20, unintentional poisoning deaths increased dramatically in the county between 2014-2015 and did not change in 2016. Compared to our peer counties, these results are similar to that of Burke, Rockingham and Wilkes Counties. Unintentional poisonings are considered when a person taking or giving too much of a substance did not mean to cause harm or death.

Of the individuals who indicated in the 2017 CHA opinion survey that they had taken a prescription drug that was not prescribed to them, 40% did so for pain while 27% did so for “other” reasons. This other reasons included but were not limited to lack of resources and being too expensive (Graph 21). Graph 22 outlines where the individuals were able to get the prescription drugs from with the top resource being from a friend (45%). Over the past 10 years, unintentional overdoses by opioids have increased dramatically. In 2005, there were 10 opiate related deaths with that number more than doubling to 23 in 2015.

To fight this issue of drug overdoses and abuse/misuse of drugs, Caldwell County is utilizing resources to fight the opioid epidemic. One way is through Operation Medicine Drop (OMD). Caldwell County has drop box locations at Caldwell County Sheriff’s Office, Lenoir Police Department, Hudson Police Department, and Granite Falls Police Department. Lenoir Police Department collected 453 lbs. of narcotics in 2017 through OMD. Caldwell County Health Department and Lenoir Police Department are currently chairs of the Caldwell County Project Lazarus, which will be a part of the upcoming action plan for the 2017 CHA.

Not only does substance abuse/misuse refer to prescription or illicit drugs, it also refers to tobacco and alcohol use. Only 11% of individuals who participated in the CHA opinion survey reported that they were current smokers (Graph 23), however 75% of people reported that they were exposed to secondhand smoke in the past year (Graph 21). Secondhand smoke is smoke exposure from a tobacco product that has been exhaled from an individual or product. An individual can be exposed to secondhand smoke either by someone else’s smoke or by their own. Of those individuals from the survey who reported exposure, 31% stated they were mostly exposed to secondhand smoke in public places. Public places are generally defined as an indoor or outdoor area, whether privately or publicly owned, to which the public have access by right or by invitation, expressed or implied, whether by payment of money or not, but not a place when used exclusively by one or more individuals for a private gathering or other personal purpose. Parades, greenways, parks and outdoor community events are just a few examples of locations where individuals reported being exposed to secondhand smoke. Dangers of secondhand smoke include heart disease, lung cancer, stroke, respiratory issues in adults and children and sudden infant death syndrome.

When looking at substance abuse and misuse, risky behaviors associated with drug use/misuse must also be examined. Risky behaviors can cause an increased possibility for contracting infections or diseases such as, HIV, hepatitis and tuberculosis. According to The North Carolina State Center of Health Statistics, in 2017, there were five acute Hepatitis C cases and four probable cases, based on
case definition of labs and symptom criteria. This is a slight decrease from 2014 and 2015, when Caldwell County had seven acute cases. The number of acute hepatitis C cases diagnosed in North Carolina in 2016 was 185. The highest rates of newly diagnosed acute hepatitis C occurred among the 20 to 39-year-old age group, which accounted for 67% of the total acute hepatitis C cases.

Caldwell County's main goal in the coming years is to decrease substance misuse within the county and take unwanted substances out of homes. Working with community agencies such as Project Lazarus, law enforcement, healthcare, faith based organizations, pharmacies, etc., the shared goal is to prevent the misuse of prescription drugs and overdoses, educate the community on the importance of disposing unwanted medications at the drop box locations, encourage individuals to lock up medications, and provide access to naloxone to the community. This will be outlined in this year's Action Plans.

Community Health Assessment Survey

**Mental Health**

Mental Health well-being, as defined by the World Health Organization, is a state in which every individual realizes his or her own potential, can cope with the normal stresses of life, can work productively and fruitfully, and is able to contribute to her or his community. Mental health is not just emotional health; it also includes psychological and social wellbeing. Mental health affects how we think, feel and act as well as how we respond to stresses, interact with others and make choices. During each stage of life, mental wellbeing is important. Issues around mental health continue to be a target area for improvement in Caldwell County. Mental Health issues include anxiety, stress, Attention Deficit Hyperactivity Disorder (ADHD), bipolar disorder, depression, eating disorders, obsessive-compulsive disorder (OCD), posttraumatic stress disorder, schizophrenia, etc. (from NAMI). Mental health is historically correlated with suicide; therefore, Caldwell County will focus on decreasing suicide rates as part of the mental health priority.
Mental Health in Caldwell County

In the 2017, Community Health Assessment Survey, over 20%, of those who responded, indicated having a one-day in the last month where they felt sad or worried (Graph 25). The injury and prevention branch at the North Carolina Department of Public Health stated, “64 percent of females and 39.5 percent of males were currently being treated for a mental health problem at the time of suicide. Of the 2,062 violent deaths in North Carolina in 2015, 1,379 were suicides (66.9%). Males consistently had a higher suicide rate than females, regardless of age. The suicide rate peaked for men 85 years and older at a rate of 68.1 per 100,000. Among females, the suicide rate peaked for ages 45-54 at 12.1 per 100,000 and steadily declined thereafter.”

The suicide rate in Caldwell County during 2008-2012 (per 100,000 residents) was 16.7, which was higher than its peer counties of Wilkes, Surry, Burke, Lee, and Rockingham. Between 2012-2016, there were 87 suicide deaths in Caldwell County. Beginning in 2014, suicide began showing up on the leading causes of death in Caldwell County. In 2014, suicide/intentional self-harm ranked tenth and in 2015 it ranked ninth. While resources are limited for mental health, this does not eliminate the need for services in Caldwell County. Since this need is so large, community partners will focus on providing adequate resources to the public with the goal of reducing the stigma surrounding these conditions and working towards increasing the support that is in place to provide help to those suffering from mental health conditions.
"In 2008, suicide was the fourth leading cause of injury death in North Carolina and was among the top five leading causes of injury death for North Carolinians aged 10 years and older. Depression, which is the second leading cause of life lived with a disability in the state, is a leading cause of suicide." - North Carolina Institute of Medicine. Healthy North Carolina 2020: A Better State of Health.

There are current organizations in the community working towards this goal. Caldwell UNC Health care is working on providing outpatient depression screenings at all clinics, providing mental health screenings in the emergency department, and holding mental health meetings quarterly at the hospital which allows collaboration between local department of social services, health department, local police department, and Vaya Health. Other resources include having a mental health counselor recruited to assist with placement of patients presenting with mental health issues in the emergency department and access to a resource guide in all clinics to help patients access healthcare services, specifically mental health services.

Community partners that are also working towards decreasing suicide and targeting mental health disparities include Caldwell County Health Department, Project Lazarus, a regional collaboration to help address issues of prescription drug abuse (further described under the substance abuse priority below), VAYA Health and RHA Health Services. In 2016, the Caldwell County Comprehensive Care Center, a full-service behavioral health care center in Lenoir, opened. This Center offers 24-hour mental health and addiction urgent care, outpatient behavioral health treatment and 12 beds for people in crisis, regardless of insurance status.

Caldwell County Health Department provides a variety of resources as well. These include support for emotional well-being, psychological well-being and social well-being. Some aspects that affect mental health are adequate housing, safe neighborhoods, equitable jobs and wages, quality education, and equity in access to quality health care.

---

**Plans for Next Steps**

The Community Health Assessment Advisory Committee will begin reviewing each of the selected priorities and determine what groups are already established in the county, which are focused on these issues. Members of the committee will work with established groups to plan and implement action plans for the coming three years. These partnerships will be guided by the Caldwell County Health Department and data collection regarding timelines and benchmarks met will be disseminated through State of the County Health Reports and other documents throughout the county and between groups and committees.
Acknowledgements

The Caldwell County Community Assessment Advisory Committee would like to thank the following individuals and agencies for their contributions throughout this assessment process. These individuals were selected for this committee because of their extensive knowledge and support of the health and well-being of Caldwell County citizens. Without their efforts, this assessment would not have been possible. The strengthened partnerships resulting from this collaboration will continue throughout the coming years.

Appendix A: 2017 Caldwell County CHA Survey

The purpose of this survey is to learn more about health and quality of life in Caldwell County. The Caldwell County Health Department, Caldwell-UNC Healthcare, and various community-based agencies will use the results of this survey and other information to identify the most pressing health problems in Caldwell County and to develop plans to address those identified problems. All the information you give us will be completely confidential and will not be linked to you in any way. Thank you for taking the time to complete this Community Health Survey.

Do you live in Caldwell County?  Yes _____ No ____

Are you 18 years old or older? Yes ____ No ____

***If you said No to question one or two, please stop at this point. Thank you for your time.

Have you participated in this year’s survey already? Yes ____ No ____ Not sure ____

***If you answered Yes to this question, please stop at this point. Thank you for your time.

The first set of questions has to do with quality of life in Caldwell County.

<table>
<thead>
<tr>
<th>Statements</th>
<th>Circle the number that best represents the person’s opinion of each statement below.</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>1. “There is good healthcare in Caldwell County.” Consider the cost and quality, number of options, and availability of healthcare in the county.</strong></td>
<td>1 2 3 4 5</td>
</tr>
<tr>
<td><strong>2. “Caldwell County is a good place to raise children.” Consider the quality and safety of schools and childcare programs, after school programs, and places to play in this county.</strong></td>
<td>1 2 3 4 5</td>
</tr>
<tr>
<td><strong>3. “Caldwell County is a good place to grow old.” Consider the county’s elder-friendly housing, transportation to medical services, recreation, and services for the elderly.</strong></td>
<td>1 2 3 4 5</td>
</tr>
<tr>
<td><strong>4. “There is plenty of economic opportunity in Caldwell County.” Consider the number and quality of jobs, job training/higher education opportunities, and availability of affordable housing in the county.</strong></td>
<td>1 2 3 4 5</td>
</tr>
</tbody>
</table>
5. “Caldwell County is a safe place to live.”
Consider how safe you feel at home, in the workplace, in schools, at playgrounds, parks, and shopping centers in the county.

| 1 | 2 | 3 | 4 | 5 |

6. “There is plenty of help for people during times of need in Caldwell County.”
Consider social support in this county: neighbors, support groups, faith community outreach, community organizations, and emergency monetary assistance.

| 1 | 2 | 3 | 4 | 5 |

The next several questions or statements ask about community problems, issues, and services that may be important to you. Remember that your choices will not be linked to you in any way.

7. In regards to overall quality of life in Caldwell County, which community issues have the greatest effect? Please choose up to five.

      ____ Yes___ No ____ DK
   f. Osteoporosis
      ____ Yes___ No ____ DK
   g. Overweight/Obesity
      ____ Yes___ No ____ DK
   h. Angina/ heart disease
      ____ Yes___ No ____ DK
   i. Cancer
      ____ Yes___ No ____ DK
   j. COPD
      ____ Yes___ No ____ DK

17. **In the past 30 days, have there been any days when feeling sad or worried kept you from going about your normal business?**

   ____ Yes____ No ____ Don’t know/ Not sure

18. **In the past 30 days, have you had any physical pain or health problems that made it hard for you to do your usual activities such as driving, working around the house, or going to work?**

   ____ Yes____ No ____ Don’t know/ Not sure

19. **During a normal week, other than in your regular job, how many times do you engage in any physical activity or exercise that lasts at least a half an hour?**

   a. ____ Not at all
   b. ____ Once
   c. ____ Twice
   d. ____ Three times
   e. ____ Four to seven times. Please specify: ____

20. **Where do you go to exercise or engage in physical activity?**

   a. ____ Public gym (Quest4Life, Anytime Fitness, etc.)
   b. ____ Park
   c. ____ Public recreation center
   d. ____ Private gym (Golds Gym, Planet Fitness, etc.)
   e. ____ Home
   f. ____ Greenway/Blueway
   g. ____ Cycling
   h. ____ Other. Please specify: ___________________________________________________
   i. ____ I don’t engage in physical activity during a normal week.

21. **If you do not engage in exercise or other physical activity for at least half an hour a week, what are the reasons that you don’t?** You may give as many of these reasons as you need to.
a.____ My job is physical or hard labor.
b.____ Exercise is not important to me.
c.____ I don’t have access to a facility that has
    the things I need, like a pool, golf course, or
    track.
d.____ I don’t have enough time to exercise.
e.____ I would need child care and I don’t have it.
f.____ I don’t know how to find exercise partners.
g.____ I don’t like to exercise.
h.____ It costs too much to exercise.
i.____ There is no safe place to exercise.
j.____ I’m too tired to exercise.
k.____ I’m physically disabled.
l.____ I don’t know.
m.____ Other. Please specify: ________________________

22. How many cups per week of fruits and vegetables would you say you eat? (One apple or 12 baby
    carrots equal one cup.) Write ‘0’ if you never consume the item the answer choice is referring to.

a. ____ Number of cups of fruit
b. ____ Number of cups of vegetables
e. ____ Number of cups 100% fruit juice

23. Where do you prefer to get fresh fruits and vegetables during the summer?

a. ____ Own garden
b. ____ Supermarkets
c. ____ Farmer’s market
d. ____ Road side stand or farm
e. ____ I have no access to fresh fruits and vegetables.

24. Where would you be willing to attend a health education class? A health education class might
    address many different subjects, such as healthy eating, chronic disease management, active living, and so
    on.

a. ____ Place of worship
b. ____ In the home
c. ____ Doctor’s office
d. ____ Health department
e. ____ Hospital
f. ____ Community event
g. ____ Other. Please specify: ________________________
h. ____ I wouldn’t attend a health education class.

25. If you think you were exposed to second-hand smoke in the past year, where did that happen?
    Please check all that apply.

a. ____ Home
2017 Community Health Assessment

b. _____ Workplace
c. _____ Hospitals
d. _____ Restaurants
e. _____ School
f. _____ Other. Please specify: ___________________________________________________
g. _____ I was not exposed to second-hand smoke in the past year.
h. _____ I don’t know or am not sure whether I was exposed to second-hand smoke in the past year.

26. **What types of tobacco products do you use?** If you do not use tobacco products, please skip to Question 28. Please choose all that apply or select “I do not use any tobacco products.”
a. _____ Cigarettes
b. _____ Smokeless tobacco (dip, snuff)
c. _____ Pipe
d. _____ Cigars
e. _____ E-cigarettes
f. _____ I do not use any tobacco products.

27. **If you wanted to quit using tobacco products, or wanted to help a friend quit, where would you go for help?** Please choose only 1.
a. _____ Quit Line NC
b. _____ Doctor
c. _____ Church
d. _____ Pharmacy
e. _____ Counselor / therapist
f. _____ Health department
g. _____ I don’t know where I would go
h. _____ Other. Please specify: ___________________________________________________
i. _____ I do not use tobacco products

28. An influenza or flu vaccine can be a "flu shot" injected into your arm. **During the past 12 months, have you had a seasonal flu vaccine of any kind?**
   Yes, flu shot _____ No flu vaccine at all _____

29. **In the past year, have you taken a prescription drug that was not prescribed for you?**
   Yes _____ No _____

   If yes, what is your reason why you took a prescription drug that was not prescribed to you?
a. _____ Pain
b. _____ Infection
c. _____ Lack of resources to get own medication
d. ___ Other. Please specify: ________________________________

If yes, where did you get the prescription drug?
   a. ___ Friend
   b. ___ Neighbor
   c. ___ Parent
   d. ___ Sibling
   e. ___ School
   f. ___ Other. Please specify: ________________________________

The next few questions gather information about your access to care. Remember, the answers you give for this survey will not be linked to you in any way.

30. **Where do you most often go when you are sick?** Here are some possibilities. Choose only one please.
   ___ Doctor’s office
   ___ Medical Clinic
   ___ Health department
   ___ Urgent Care Center
   ___ Helping Hands
   ___ Rural Health Clinic
   ___ Free Clinic (Happy Valley/Collettsville)
   ___ Hospital
   ___ Other: __________

31. **What is your primary health insurance plan?** This is the plan which pays the medical bills first or pays most of the medical bills. Please choose only one.
   a. ___ The State Employee Health Plan (also known as the North Carolina Teachers’ and Employee Health Plan)
   b. ___ Blue Cross and Blue Shield of North Carolina
   c. ___ Other private health insurance plan purchased from employer or workplace
   d. ___ Other private health insurance plan purchased directly from an insurance company
   e. ___ Medicare (a federal health insurance program for people 65 and older and some younger people with disabilities)
   f. ___ Medicaid or Carolina ACCESS or NC Health Choice (Medicaid is a state health insurance program for families and individuals with limited financial resources or special circumstances)
   g. ___ The military, Tricare, CHAMPUS, or the VA
   h. ___ The Indian Health Service
   i. ___ Other government plan
   j. ___ No health plan of any kind
   k. ___ Don’t know / Not sure

32. **In the past 12 months, did you have a problem getting the health care you needed for you personally or for a family member from any type of health care provider (medical doctor/physician or nurse practitioner), dentist, pharmacy, or other facility?**
   ___ Yes ___ No ___ Don’t know/ Not sure

You can choose as many of these as you need to. If you tried to see a provider that we do not have listed here, please write it in.

___ Dentist
___ General practitioner
___ Eye care/ optometrist/ ophthalmologist
___ Pharmacy/ prescriptions
___ Pediatrician
___ OB/GYN
___ Health department
___ Helping Hands Clinic
___ Free Clinic
___ Hospital
___ Urgent Care Center
___ Medical Clinic
___ Specialist. Please specify what type: ________________________________
___ I did not have trouble getting healthcare

34. In the past 12 months, what problems prevented you or your family member from getting the necessary health care? You may choose as many of these as you need to or choose ‘I did not have trouble getting healthcare’. If you had a problem that we have not written here, please write it in.

a. ___ No health insurance.
b. ___ Insurance didn’t cover what I/we needed.
c. ___ My/our share of the cost (deductible/co-pay) was too high.
d. ___ Doctor would not take my/our insurance or Medicaid.
e. ___ Hospital would not take my/our insurance.
f. ___ Pharmacy would not take my/our insurance or Medicaid.
g. ___ Dentist would not take my/our insurance or Medicaid.
h. ___ Mental/Behavioral Health
i. ___ No way to get there.
j. ___ Didn’t know where to go.
k. ___ Couldn’t get an appointment.
l. ___ The wait was too long to make an appointment
m. ___ The wait was too long to be called back to see care provider
n. ___ Other. Please specify: ________________________________
o. ___ I did not have trouble getting healthcare

35. If a friend or family member needed counseling for mental health or a problem with alcohol or other drugs, who is the first person you would tell them to talk to? Here are some possibilities. Please choose only one.
36. If a friend of family member had a mental health problem or a problem with alcohol or other drugs, where would be the first place you would tell them to go for help? Please choose one.

a. _____ DSS/Social Services
d. _____ Caldwell House
b. _____ RHA Mental Health
e. _____ Emergency Department
c. _____ Bethel Colony
f. _____ Other: __________________________

37. In the past thirty (30) days, how many times have you visited an emergency room?

a. ___ Not at all
b. ___ Once
c. ___ Two to five times
d. ___ Six to ten times
e. ___ Eleven to fifteen times
f. ___ Sixteen or more times. Please state how often: _____

38. If you have visited an emergency room in the past thirty (30) days, what caused you to go? Please check all that apply.

a. ___ Acute sick visit
b. ___ Injury (includes cuts, broken bones, and machinery mishaps)
c. ___ Poisoning (includes snake bites and insect stings)
d. ___ Mental health issue
e. ___ Substance use issue
f. ___ Having had a fall
g. ___ Ordinary health care needs
h. ___ Other. Please specify: __________________________

39. If you visited an emergency room in the past thirty (30) days, what time of day did you go?

a. ___ 8 in the morning till 12 noon
b. ___ 12 noon to 4 in the afternoon
c. ___ 4 in the afternoon till 8 in the evening
d. ___ 8 in the evening till 12 midnight
e. ___ 12 midnight to 4 in the morning
f. ___ 4 to 8 in the morning

40. If you use the emergency room as your first choice for health aid, what leads you to make that choice?

a. ___ Lack of health insurance
b. ___ No primary care physician
c. ___ Lack of insurance for a child
d. ___ Convenience  

e. ___ Travel restrictions  

f. ___ Lack of access to care after office hours  

g. ___ Finances  

h. ___ Other. Please specify: ________________________________  

i. ___ I do not use the emergency room as my first choice for health aid.

41. **In your opinion, who are the people that the Caldwell County Health Department serves?** You may choose all answers that you think apply.

a. ___ Uninsured people  
b. ___ People with Medicaid  
c. ___ Anyone who needs care  
d. ___ People who need immunizations  
e. ___ People seeking maternal/pregnancy care  
f. ___ People seeking sexual health services (includes contraceptives, STD treatment, and family planning)  
e. ___ Other. Please specify: ________________________________  

42. **If you choose not to go to the health department for your health care, what leads you to make that choice?** Choose as many as apply.

a. ___ I do go to the health department for my health care needs.  
b. ___ I get my health care from a different provider, but I do go to the health department occasionally (for example, for vaccines).  
c. ___ I avoid the health department because I do not like the services the health department offers.  
d. ___ I avoid the health department because I do not like/enjoy the staff at the health department.  
e. ___ I avoid the health department because I understand it serves only people with limited financial means.  
f. ___ I avoid the health department because it is too far away from my home.  
g. ___ I avoid the health department because it costs too much to get services from it.  
h. ___ I avoid the health department because no one there speaks my language.  
i. ___ I avoid the health department because I do not like the other clients I see there.  
j. ___ I avoid the health department because they do not take my insurance.  
k. ___ I avoid the health department because I am unaware of services they provide.  
j. ___ Other. Please specify: ________________________________  

43. **What is your main mode of transportation?** Choose only one.

a. ___ Own vehicle  
b. ___ Family member  
c. ___ Public transportation  
d. ___ Taxi (Uber, private taxi service, etc.)
2017 Community Health Assessment

44. On what day(s) and time of the week is it hardest for you to find transportation? (Check all that apply)
   a. ___ Monday
   b. ___ Tuesday
   c. ___ Wednesday
   d. ___ Thursday
   e. ___ Friday
   f. ___ Saturday
   g. ___ Sunday
   h. ___ Early Morning; 5:00AM-8:30AM
   i. ___ Late Morning; After 8:30AM-Noon
   j. ___ Early Afternoon; Noon-3:00 PM
   k. ___ Late Afternoon; 3:00PM-6:00PM
   l. ___ Evening; 6:00PM-9:00PM
   m. ___ Late Night; 9:00PM and later
   n. ___ I do not have trouble finding transportation

45. What type of housing do you have?
   a. ___ Own your own home
   b. ___ Rent a house/apartment
   c. ___ Income based or HUD funded
   d. ___ Live with parents
   e. ___ Live with a family member(s)

   a. ____ Computer at home
b. ____ Computer at public library

c. ____ Computer at a school library (public school or college)

d. ____ Computer at some other public location (restaurant, coffee shop, and so on)

e. ____ Cell phone or smart phone

f. ____ Computer at work

g. ____ Choose not to use the internet

h. ____ Other. Please specify: ____________________________________________________

h. ____ I have no access to the Internet.

52. Sometimes public authorities know that a disaster is about to strike a community and sometimes they order people to evacuate a neighborhood or community for their own safety. **If you were asked to evacuate your home but chose not to leave, what would be the main reason for your staying in your home?** Please check ONLY ONE.

a. ____ Lack of transportation

b. ____ Lack of trust in public officials

c. ____ Concern about leaving property behind

d. ____ Concern about personal safety

e. ____ Concern about family safety

f. ____ Concern about leaving pets

g. ____ Concern about traffic jams and inability to get out

h. ____ Health problems (such that you could not be moved)

i. ____ Other. Please describe: __________________________________________________

j. ____ Don’t know or not sure

k. ____ This question does not apply to me. I would evacuate my home if public authorities asked me to.

53. **Does anyone in your household know CPR?** Yes ____ No ____

The following set of questions is the last in this survey. These are general questions about you. Your answers will be reported only in a summary of all answers given by survey participants. Your answers will remain anonymous.

54. **How old are you?**

___ 18-24

___ 25-29

___ 30-34

___ 35-39

___ 40-44

___ 45-49

___ 50-54

___ 55-59

___ 60-64

___ 65-69

___ 70-74

___ 75-79

___ 80-84

___ 85 or older

55. **Are you male or female?** Male ____ Female ____

56. **Are you of Hispanic, Latino, or Spanish origin?** Yes ____ No ____

57. **If you are of Hispanic or Latino background, would you describe yourself as:**

___ Mexican, Mexican American, or Chicano
___ Puerto Rican
___ Cuban
___ Other Hispanic or Latino. If so, please specify: ________________________________

58. **What is your race?** Please check all that apply.
___ White
___ Black or African American
___ American Indian or Alaska Native
___ Asian Indian
___ Other Asian including Japanese, Chinese, Korean, Vietnamese, and Filipino/a:
   Please write in your race: ________________________________________________
___ Pacific Islander, including Native Hawaiian, Samoan, Guamanian/Chamorro:
   Please write in your race: ________________________________________________
___ Other race not listed here. Please write it in: ________________________________

59. **What is the language that you and your family speak at home?**
   a. ___ English
   b. ___ Spanish
   c. ___ Hmong
   d. ___ Sign language
   e. ___ Other. Please specify: ________________________________________________

60. **What is your marital status?** Please mark only one. No explanation is needed for “other.”
___ Never married / single
___ Divorced
___ Other
___ Married
___ Widowed
___ Unmarried partner
___ Separated

61. **What is the highest level of school, college, or vocational training that you have finished?** Please mark ONLY ONE.
___ Less than 9th grade
___ 9th to 12th grade, no diploma
___ High school graduate (or GED / equivalent)
___ Associate’s degree or vocational training
___ Some college (no degree)
___ Bachelor’s degree
___ Graduate or professional degree
___ Other. Please specify: ____________________________________________________

62. **What was your total household income last year, before taxes?** Please mark only one.
___ Less than $10,000
___ $10,000 to $14,999
___ $15,000 to $24,999
___ $25,000 to $34,999
___ $35,000 to $49,999
___ $50,000 to $74,999
___ $75,000 to $99,999
___ More than $100,000
___ $25,000 to $34,999  _______ $100,000 or more

63. **How many people does the income reported support?** ___

64. **What is your employment status?** Please check all that apply.
   a. _____ Employed full-time
   b. _____ Employed part-time
   c. _____ Retired
   d. _____ Armed Forces
   e. _____ Unemployed for more than 1 year
   f. _____ Disabled
   g. _____ Student
   h. _____ Homemaker
   i. _____ Self-employed
   j. _____ Unemployed for 1 year or less

65. **What is your zip code?** ____________________________

- 28630: 0%
- 28638: 1%
- 28645: 2%
- 28661: 2%
- 28667: 0%

Total: 67%
Appendix C: 2017 Caldwell County CHA Focus Group Qualitative Results

Focus group on Chronic Disease:
- Family Resource Center - Been HIV positive for 3 years and this community has excellent resources and services through ALPHA. It is a bigger problem than people think. It used to be considered a death sentence, and now people can live with it as a chronic disease.
- County - Get access to preventative care and that would stop all chronic disease issues, catching them faster, as well as mental health issues sooner. Should be available to everyone. If people were willing to pay then all issues would decrease.
- County - I don't have a chronic disease, but I worry/stress because my family members have chronic disease and this directly impacts my health.
- Hibriten High School - Aunt has heart failure but Caldwell ER just sends her home and blows her off. I don’t think she is getting the care she needs.
- Hibriten High School - WIG Bank is a great program but we need more similar programs to assist with other chronic diseases.

Focus group on Education/Economy:
- Family Resource Center - Rent/living is too high for me to even think about healthcare.
- Family Resource Center – The cost to go to the doctor and to get medicine is bothersome for people in various ways. People are choosing between eating, and staying warm, and every time we turn around they are cutting our salary and not theirs.
- County - Money prevents people from going to the doctor for additional tests.
- Hibriten High School - Money impacts my health because I can’t afford certain things like a gym membership.

Focus group on Mental Health:
- Family Resource Center - My grandchild has Sensory Processing Disorder and I’ve had to deal with mental health places. They were always nice, but Medicaid didn’t fully cover the visits and we stopped going.
- Family Resource Center - It is not fun dealing with people who have mental health disorders.
- Senior Center - Substance abuse and mental health go hand in hand. Substance abuse can lead to mental health
- County - Daughter seeking counselor and knew she needed to talk with someone who was neutral. Stepdaughter was the same and dealing with multiple disorders – but as she got older doctors recommended some ways to deal with them but she chose not to.
• County - ADHD misdiagnosed as PTSD within kids
• County - No resources for children under 20, it takes 3+ days to get committed, or go to Asheville ect. To receive help.
• County - Start earlier, how can we as a community deal with issues within children (more mental health in school)
• County - Can we diminish the negative stigma?
• County - Mental health disorders are being addressed as a behavior disorder, not only learning disability but as a mental health disorder.

Focus group on Substance Abuse:
• Family Resource Center – I started abusing drugs as a teenager and for a period of time, until someone helped me realize that I needed treatment and forced me to go, I overcame it by strengthening and focusing on both my body and mind.
• Family Resource Center – You can go say your foot hurts and get a prescription, it's that easy.
• Senior Center - Doctors are prescribing or trying anything these days
• Senior Center - I have a very good doctor, but there is good and bad. Doctors should watch pain level after surgery and only supply medication for the first couple weeks, not months.
• Hibriten High School - Personally, my mom drinks a lot and when she is drunk it damages me.
• Hibriten High School - Impacts my family because a lot of family members use substances.

Focus group on Preventative Care:
• Family Resource Center – It seems like a sliding scale at the health department, if someone has no income then they receive free care, but for someone who only makes $5 an hour then they don't get a discount.
• Family Resource Center – The community should provide free information for people with no insurance.
• Family Resource Center – I get my information in the mail. I think the best way to receive information is through postal, specifically on seasonal allergies and flu shots.
• Family Resource Center – I think the health department is the best place to start for healthcare information.
• County - My husband refuses to go to doctor – not important to him. If he goes it is because something is wrong.
• Hibriten High School - People who don't go to the doctor/dentist for prevention need to be more aware of the benefits and health risks.
Health Care

Caldwell-UNC Healthcare
Caldwell-UNC Healthcare is the only hospital in the county and is the parent organization to more than 20 private physicians’ offices. The facility provides general and orthopedic surgery, urology, gynecology, obstetrics, and ophthalmology. Medical services include emergency medicine, outpatient surgery, x-ray, nuclear medicine, ultrasound/MRI/CT scanning, physical therapy, EKG, stress testing, respiratory therapy, and emergency medicine services 24hrs a day.

Caldwell County Health Department
Caldwell County Health Department is the only health department in the county. This facility provides a variety of services including preventative screenings, education, diagnosis, and treatment of many health conditions.

Dental clinic
Basic preventative and restorative dental services for children between the ages of 4-18 who are enrolled in North Carolina Health Choice or Medicaid.
For more information please call: Phone: 828-426-8525

Health Education and Promotion
Information and assistance with healthy lifestyle choices related to nutrition, physical activity, tobacco cessation, preventative screenings, STD awareness, healthy pregnancies, chronic disease self-management, diabetes self-management courses and a variety of other health-related issues.
For more information please contact: 828-426-8506

Clinical Services
The clinic provides a comprehensive range of services that include primary care for acute illness for adults and children, physicals, family planning services, maternity care, immunizations, surveillance, testing and treatment of communicable diseases, and STD testing and follow up. The Breast and Cervical Center Control Program (BCCCP) is also available for women ages 50 and older. The program provides clinical breast exams, pap smears, and mammograms for financially eligible women.
For more information please contact: 828-426-8400
**Child Health**
Care Coordination for Children (CC4C) is a program that helps families find and use community services. The program aims to connect families with services for children and families, to support children in reaching their developmental potential, and to help ensure that children are raised in healthy, safe, and nurturing environments. Children birth to age three at risk for developmental delay or disability, long term illness and/or social, emotional disorders and children ages birth to five diagnosed with developmental delay or disability, long term illness may be eligible for the program. For more information please contact: 828-426-8428

**Women’s Health**
This program provides client-centered services to pregnant and post-partum women. Services include pregnancy testing, counseling, routine and sick maternal health clinic visits and ultrasounds. For more information please contact: 828-426-8488

**WIC**
This service provides nutrition counseling and supplemental food vouchers for women who are pregnant, post-partum, or breastfeeding, as well as infants and children up to the age of five years of age who meet financial eligibility requirements and who are at nutritional risk. For more information please contact: 828-426-8407
www.mywic.org

**Environmental Health**
This program provides permits for new septic systems and existing systems, new private drinking water wells and repairs to existing wells. Staff provide routine inspections of restaurants, motels, bed and breakfasts, institutions, hospitals, school cafeterias, and summer camps, pools, tattoo parlors, and daycares to insure sanitation standards are met. This department also provides testing of blood lead levels and conducts investigations of confirmed elevated blood lead levels in children to determine point of contact. For more information please contact: 828-426-8537

Home Care Management Corporation
Home Care Management Corporation provides the services necessary for people with disabilities to be as comfortable and independent as possible in their own homes. The services provide a viable, affordable alternative to institutional living. The programs serve developmentally disabled adults and children and people with physical disabilities. The agency offers in-home personal care, mental health services, services under the Community Alternatives Program for Disabled Adults, Mentally Retarded, and Developmentally Disabled (CAP-DA, MR/DD) assessment, vocational rehabilitation supported employment and employee leasing to human service agencies. They also offer Multisystem Therapy, Early Childhood Intervention and in-school behavioral support programs for children with special needs in NC.

Helping Hands Clinic
Helping Hands Clinic provides high-quality, free medical care to patients without health insurance. A full-time provider is available 4 days per week for acute, urgent, follow-up and preventative care. Helping Hands Clinic provides a high quality, cost-effective alternative to the local emergency room. Patients with chronic diseases like Diabetes, COPD and similar respiratory diseases, complicated heart disease and some forms of arthritis can be enrolled in the Caldwell Health Access Program or CHAP. This program pairs uninsured patients with volunteer medical providers in Caldwell County who have agreed to manage patients with chronic diseases in their offices. Patients enrolled in CHAP have access to all Helping Hands services. Helping Hands offers a fully licensed pharmacy with free medications available to eligible patients. Most medications are accessed through the Patient Assistance Program and may take up to 8 weeks to be available. Helping Hands Clinic does not write prescriptions for or dispense narcotics of any kind. Helping Hands Clinic believes that patients who are invested in their personal health become healthier, so patients are asked to make a $5 donation for services.

Caldwell County Hospice and Palliative Care
With a holistic approach to care, Caldwell Hospice serves the physical, emotional and spiritual needs of the terminally ill and those they love. They recognize dying as a natural part of living, and help patients live as pain-free and comfortably as possible, so they can enjoy each day with their loved ones.
Caldwell Hospice professionals provide direct care and teach caregivers how to address many of the patients’ physical needs; a physician, nurse practitioner, nurse, social worker and chaplain are on call. Medical social workers, a counselor, chaplains and volunteers provide emotional and spiritual support.

Mental Health

The Caldwell House
The Caldwell House provides structure, responsibility and accountability which are key to a person’s recovery. The House accepts only those persons who have completed at least 4 weeks of in-patient substance abuse treatment. The residents are adult males only. Residents accepted to the Caldwell House are able to benefit from its therapeutic program as they learn how to re-enter society in a safe and healthy environment. Intake procedures include, reviewing assessments (which helps identifies maladapted behavior or the presence of other conditions, which may cause susceptibility to abuse by self or others) and going over treatment and aftercare plans to determine if the resident meets program admission criteria. Individuals who do not meet certain admission criteria may not be accepted to the House. An average stay at Caldwell House is between 8 and 12 months. The House requires at least a 4 month commitment from residents and active involvement in the implementation of aftercare plans and employment.
